

# PRODUCT DESIGN (CER)

- Investigating, primary and secondary data
- Environmental, social and economic challenge
- The work of others
- Design strategies
- Communicating of design ideas
- Selection of materials and components

Exam  
Deadline for NEA

6 - Analysing and Evaluating  
2D DESIGN

3 - Generating Design Ideas

2 - Design Brief / Specification

1 - Investigating Design Possibilities

5 - Realising Design Ideas

YEAR 11

Actual NEA

Designing and making principles

Mini NEA practice

Specialist technical principles

Evaluate Energy generative and storage  
Evaluate New and emerging technologies

Evaluate Developments in new materials  
Create Understanding a systems approach when designing

Evaluate Mechanical devices  
Evaluate Materials and their working properties

Evaluate Selection of materials  
Forces and stress

Ecological and social footprint  
Sources and origins

Using and working with materials  
Stock forms, types and sizes

Scale of production  
Create Delft clay casting

Create/make Ferrous metal fish  
Specialist processes  
Surface treatments and finishes

Core technical principles

YEAR 10

Make: Can you make an accurate product using machines and tools independently?  
Evaluate: What skills have you developed? Test your product and consider how you would improve it.

Evaluate: What skills have you developed? Test your product and consider how you would improve it.  
Evaluate DIRT

Mastering Threading up the sewing machine  
Technical: 6 R's Materials and sustainability

Explore: Analyse a problem Who, what, where ....  
Testing / Modelling: Will my product work? What can I do to improve it?

Explore: The 6 R's from a designers perspective  
Explore: Definitions of keywords

Testing: Have I successfully stitched the animal so that the stuffing does not come out?  
Maths: Seam allowance/tolerance

Lamp Timber/Metal/Concrete

2D DESIGN  
Evaluate: What are the differences between CAD/CAM and hand stitching?  
Create Soldering, Basic circuits

Create Clay modelling  
Create: Applique samples. Layering of fabrics.

Explore History of automobiles  
Analyse Automation analysis

Make: Make a small stuffed animal. Developing blanket stitch skills  
Materials: Fabric properties.

Explore: Upcycling, What can my garment be turned into?  
Testing: Have I successfully stitched the animal so that the stuffing does not come out?

Explore: The 6 R's from a designers perspective  
Explore: Definitions of keywords

Testing: Have I successfully stitched the animal so that the stuffing does not come out?  
Maths: Seam allowance/tolerance

Car Plastics/polymers

Technical: Electronic components  
Testing: Does the circuit work? Why not?

Materials: Technical textiles. What is a technical textile?  
Make: Can you make the circuit light up using accurate stitching?

Materials: Smart materials. What is a smart material?  
Explore: What does each component in my circuit do?

Create: Can I stitch a neat pencil case using the sewing machine independently?  
Create Production plan, make an accurate plan for how you will construct your model

Explore: The 6 R's from a designers perspective  
Explore: Definitions of keywords

Testing: Have I successfully stitched the animal so that the stuffing does not come out?  
Maths: Seam allowance/tolerance

Pencil case Textiles

Materials: Vac Forming of clay model  
Materials: Plastics and polymers.

Maths: Conversions and scale  
Fixtures: Spot welding and pop rivets.

Evaluate: Self-evaluation. What makes a good product? How can you improve your skills?  
Maths: Seam allowance

Explore: The 6 R's from a designers perspective  
Explore: Definitions of keywords

Testing: Have I successfully stitched the animal so that the stuffing does not come out?  
Maths: Seam allowance

Explore: The 6 R's from a designers perspective  
Explore: Definitions of keywords

Testing: Have I successfully stitched the animal so that the stuffing does not come out?  
Maths: Seam allowance

Insect Metal

Explore: Definitions of keywords  
Create Use of templates and jigs

Create/Technical: Design ideas and development  
Create Metal tools Use of hand tools and machines

Materials: Ferrous and non-Ferrous metals  
Health & Safety; Personal protective Equipment

Introduction to the workshop: Health and Safety  
Introduction to the workshop: Health and Safety

Explore: The 6 R's from a designers perspective  
Explore: Definitions of keywords

Testing: Have I successfully stitched the animal so that the stuffing does not come out?  
Maths: Seam allowance

Explore: The 6 R's from a designers perspective  
Explore: Definitions of keywords

Man-made Why do we use man-made boards instead of wood sometimes?  
Technical: CAD/CAM 2D Design

Evaluate: What makes a good product? How can you improve your skills?  
Create Wood tools Use of hand tools and machines

Explore: Wood classification. Where does timber come from?  
Sustainability: Sustainable forests. Hardwoods and Softwoods

Explore: The 6 R's from a designers perspective  
Explore: Definitions of keywords

Testing: Have I successfully stitched the animal so that the stuffing does not come out?  
Maths: Seam allowance

Explore: The 6 R's from a designers perspective  
Explore: Definitions of keywords

Testing: Have I successfully stitched the animal so that the stuffing does not come out?  
Maths: Seam allowance

2D DESIGN

YEAR 7

YEAR 8

YEAR 9

YEAR 10

YEAR 11
